Classic Long

The Classic Long is our all-rounder. With its long, slim body and a wound handle of standard length this club is spinning neither too fast nor too slow. It is perfectly suitable for both, solo juggling and club passing. Due to its wide range of application it is very popular among beginners.

Classic Short

With its short body and a wound handle of standard length this club connects Flow and Classic Long. It is spinning more quickly than the Classic Long. Therefore good compensation of children's lower throwing height.

CLUBS

Pirouette

Our most popular club. There is scarcely any circus school in the world where they are not juggling with this club. The short body and the long wound handle give it this extraordinarily delicate appearance and fantastic spinning characteristics. The ideal club for aesthetes, high-speed jugglers, and for solo juggling with 5 and more clubs.

Albatros

With its thick, long body and its wound handle of standard length the Albatros is a club of rather striking appearance. Due to its thick body and its relatively high weight it is spinning very slowly. That's why this club is becoming more and more popular among beginners. It is, however, used as a passing club on stage also. Due to the weight it does withstand even strong winds.

Mirage

This club design is emphasizing the body. The slim and long Mirage with its short and thick body is first of all made for swinging specialists and contact jugglers. With its striking shape it will, however, establish its role among stage jugglers as well.

Delphin Long

With its body and a handle of standard length the Delphin Long is designed like the Classic Long. Thanks to its strong handle made of polyethylene and the heavy wooden stick in the center this club is almost indestructible. An advantageous club for beginners to whom higher tolerances on the weight are less important.

Delphin Short

The Delphin Short has a short body and a handle of standard length, same as the Classic Short. It spins somewhat more quickly than the Delphin Long and is therefore very good for children. It is equipped with a strong polyethylene handle and has a heavy and robust wooden core. The higher tolerance on the weight is scarcely perceived by beginners.

Children's Club Flow

The Flow is a specially-designed club of professional construction for children. Its extra-short and soft, wound handle plus short body make this club well-shaped, light and well-balanced. Therefore ideal for little children. Our lightest and best-spinning club.

CLUBS

HI – New Pioneer Technique.

Our patented hot-glue injection technology is applied to our Mirage Clubs. A special type of hot glue, matching our particular requirements, is being injected into an adapter, which was designed for this purpose, thus establishing a fix connection with the central ash-wood. Axial toothing protects body and handle from torsion. It is therefore no longer necessary to add a nail to the most sensitive part of the club. Break resistance was even improved.

CLUBS

Mirage Clubs

Adapted to the juggling market requirements the Mirage is a consequent further development of our juggling clubs. All our experience in modern club technology, acquired in many years, is uncompromisingly incorporated in this club. Manufactured in accordance with the new HI-technology, this is probably the most robust juggling club ever being built. Spinning characteristics, weight and balance are perfectly harmonized. The Mirage is therefore the ne plus ultra on the club market!

All Mirage Clubs are 52cm long and have a weight of 225g in all decorations.

Mirage Training

Model without decoration. With white handle and white knobs and tops.

Body available in day-glooming colors white, pink, red, yellow, green, blue and orange.

Mirage Europ Metallic

Upper and lower third of the body are covered by decoration film.

Colors: silver, red, yellow, green, pink, purple, blue.

CLUBS

Pirouette Clubs

The Pirouette Clubs are offering extremely good spinning characteristics. They are therefore suitable for fast juggling and for juggling with many clubs. Circus schools prefer the Pirouette Training in plain white.

All Pirouette Clubs are 52cm long and the 5 standard decorations have a weight of 218g.

Pirouette Training

With silver handle and colored body.

Colors: red, pink, yellow, green, purple, blue, orange, white, and plain white (with white handle).

Pirouette Circus 1/8-Deco

The body is alternately covered by 8 colored and 8 silver decoration stripes (metallic or glitter). It is therefore no longer visible.

Colors: red, yellow, green, purple, blue.

Pirouette Circus 1/2 Deco

Decoration type with colored body and 8 metallic stripes. The color of the body is therefore partly visible.

Colors: red, pink, yellow, green, purple, blue, orange.

CLUBS

Pirouette Circus Uni

The body is completely covered by decoration stripes (metallic or glitter) of one color and therefore no longer visible.

Colors: red, yellow, green, purple, blue, silver.

Pirouette Europ

Upper and lower third of the body are covered by decoration film (metallic or glitter). The white body is visible in between. No ground contact of the decoration when being dropped. This decoration is therefore more durable than the circus-deco.

Colors: red, yellow, green, purple, blue, silver.

Albatros Clubs

Compared to the Pirouette the Albatros Club is spinning extremely slowly. It is therefore popular for club passing and stage performances. Its long and thick body gives it some powerful appearance.

Length of all Albatros Clubs 52cm.

Weight 236g (all 5 decoration types).

Pirouette Volley Club

Body and handle are of the same strongly luminous color making this club quite flamboyant.

To make catching more easy we have decorated the body with some transparent foil which provides very good grip. Only one Volley Club is required to play the game. The Volley Club is the "match ball" which is thrown over the net to the opposing team. Same construction as Pirouette, but 225g in weight, available in green or orange.

Albatros Circus 1/2 Deco

Decoration type with colored body and 8 metallic stripes. The color of the body is therefore partly visible.

Colors: red, pink, yellow, green, purple, blue, orange.

Albatros Training

With silver handle and colored body.

Colors: red, pink, yellow, green, purple, blue, orange, white, and plain white (with white handle).

CLUBS

Albatros Circus 1/10 Deco

The body is alternately covered by 10 colored and 10 silver decoration stripes (metallic or glitter). It is therefore no longer visible.

Colors: red, yellow, green, purple, blue.

Albatros Europ

Upper and lower third of the body are covered by decoration film (metallic or glitter). The white body is visible in between. No ground contact of the decoration when being dropped. This decoration is therefore more durable than the circus-deco.

Colors: red, yellow, green, purple, blue, silver.

Albatros Circus Uni

The body is completely covered by decoration stripes (metallic or glitter) of one color. It is therefore no longer visible.

Colors: red, yellow, green, purple, blue, silver.

CLUBS

Classic Long Clubs

The Classic Long is our all-rounder. It is perfectly suitable for both, solo juggling and club pass-ing. Therefore ideal for beginners.

Length 52cm. Weight 218g (all 5 decoration types).

Classic Long Training

With silver handle and colored body.

Colors: red, pink, yellow, green, purple, blue, orange, black, white, and plain white (with white handle).

Classic Long Circus 1/2-Deco

Decoration type with colored body and 8 metallic stripes. The color of the body is partly visible.

Colors: red, pink, yellow, green, purple, blue, orange, black.

Classic Long Circus 1/8-Deco

The body is alternately covered by 8 colored and 8 silver decoration stripes (metallic or glitter). It is therefore no longer visible.

Colors: red, yellow, green, purple, blue.

Classic Long Circus Uni

The body is completely covered by decoration stripes (metallic or glitter) of one color. It is therefore no longer visible.

Colors: red, yellow, green, purple, blue, silver.

Classic Long Europ

Upper and lower third of the body are covered by decoration film (metallic or glitter). The white body is visible in between. No ground contact of the decoration when being dropped. This decoration is therefore more durable than the circus-deco.

Colors: red, yellow, green, purple, blue, silver.

CLUBS

Classic Short Clubs

With its short body and a wound handle of standard length this club connects Flow and Classic Long. It is spinning more quickly than the Classic Long. Therefore good compensation of children's lower throwing height.

Length 49cm. Weight 214g, all 5 decoration types.

Classic Short Training

With silver handle and colored body.

Colors: red, pink, yellow, green, purple, blue, orange, white, and plain white (with white handle).

Classic Short Circus 1/2-Deco

Decoration type with colored body and 8 metallic stripes. The color of the body is therefore partly visible.

Colors: red, pink, yellow, green, purple, blue, orange.

Classic Short Circus 1/8-Deco

The body is alternately covered by 8 colored and 8 silver decoration stripes (metallic or glitter). It is therefore no longer visible.

Colors: red, yellow, green, purple, blue.

Classic Short Circus Uni

The body is completely covered by decoration stripes (metallic or glitter) of one color. It is therefore no longer visible.

Colors: red, yellow, green, purple, blue, silver.

Classic Short Europ

Upper and lower third of the body are covered by decoration film (metallic or glitter). The white body is visible in between. No ground contact of the decoration when being dropped. This decoration is therefore more durable than the circus-deco.

Colors: red, yellow, green, purple, blue, silver.

Children's Club Flow

A juggling club for children, robust and without decoration. With its length of 46cm it is shorter than the Short Handle Clubs and therefore perfectly suitable for short arms. Wound handle and low weight meet the requirements of little beginners and facilitate the first steps into club juggling. Handle white, knobs and tops black.

Length 46cm, weight approx. 190g.

Colors: red, yellow, green.

CLUBS

Delphin Long Training

This club was designed as an inexpensive and hard-wearing club for beginners. Dimensioned like the Classic Long but with a white polyethylene handle, which is somewhat harder when being caught than the wound handles of Classic, Pirouette or Albatros clubs. The weight tolerance of +/- 5g is considerably higher than that of all other HENRYS clubs. Length 52cm. Weight approx. 205g.

Colors: red, pink, yellow, green, purple, blue, orange, black, white.

Delphin Short Training

The Delphin Short is designed like the Delphin Long. Same handle length but shorter body. Therefore spinning somewhat more quickly than the Delphin Long and thus compensating the lower throwing heights of children. The weight tolerance of +/- 5g is considerably higher than that of all other HENRYS clubs. Length 49cm. Weight approx. 208g.

Colors: red, pink, yellow, green, purple, blue, orange, white.

Delphin Long Luna

The Luna is designed like the Delphin Long. Body and handle are made of phosphorescent polyethylene; with glow-in-the-dark effect after being illuminated before by a strong light source.

Length 52cm. Weight approx. 205g.

CLUBS

Knobs and Tops

Our knobs and tops, made of light-rubber material, are suitable for all HENRY'S clubs. Knobs are fixed by a plastic washer and a soft stainless steel screw.

Tops are self-adhesive and additionally fixed by a steel washer and a soft stainless steel screw. Soft screws are unbreakable and easy to replace.

Tops protect the body from breaking and have to be replaced regularly.

No other screws should be used on knobs and tops than our unbreakable stainless steel screws.

Delphin Knob

This knob is standard on Flow, Delphin, Pirouette, Albatros and Mirage.

Colors: black, white.

Classic Knob

This knob is standard on Sparklers, Nite-Flite, and Classic.

Colors: black, white.

Round Knob

This knob is standard on Swinging Torches. But it is also suitable for all other HENRY'S clubs. With integrate washer.

Colors: black, white, black-white.

Standard Top

This top is standard on Delphin, Albatros and Mirage clubs.

Colors: black, white.

Classic Top

This top is standard on Flow, Classic and Pirouette clubs.

Colors: black, white.

Replacement Screws

Extra-soft stainless steel replacement screws for knobs and tops. Including plastic and steel washers.

Decoration Set Europ Long

Colored decoration set in metallic or glitter for Classic Long and Delphin Long.

Colors: red, yellow, green, purple, blue, silver.

Decoration Set Europ Short

Colored decoration set in metallic or glitter for Classic Short, Delphin Short, and Pirouette.

Colors: red, yellow, green, purple, blue, silver.

CLUBS

Decoration Set Europ Albatros

Colored decoration set in metallic or glitter suitable for Albatros.

Colors: red, yellow, green, purple, blue, silver.

Decoration Set Europ Mirage

Colored decoration set in metallic or glitter suitable for Mirage.

Colors: red, yellow, green, purple, blue, silver.

Adhesive Tape

Black or white adhesive tape for Europ-Decoration. The tape is put on the transition of decoration foil and body.

Roll of 10m, 12mm wide, for approx. 6 clubs.

Textile Tape

Hard wearing adhesive tape between handle and body, 19mm wide.

Roll of 2.75m, for approx. 10 clubs.

Colors: black, white.

Decoration Tape for Circus-Decoration

Adhesive tape on carrier foil for Circus-Decoration. Width 19mm.

Roll of 10m in metallic or glitter
Colors: red, yellow, green, purple, blue, silver.

Roll of 100m in metallic or glitter
Colors: red, yellow, green, purple, blue, silver.

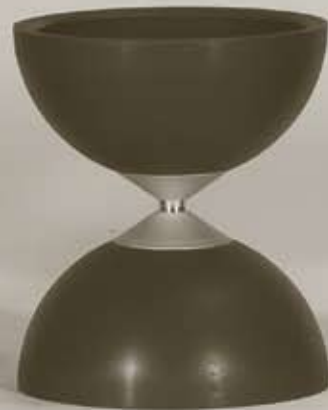

DIABOLOS

"Highest precision for real professionals."

Our Diabolos Jazz and Circus fulfil even the highest demands. Optimal mass distribution results in a perfect moment of inertia at minimum weight, thus enabling long spinning times without drive. The half shells are manufactured in our own factory on the latest injection moulding machines. The perfectly-fit arrangement of the individual parts provides for non-vibrating rotation.

For our diablo half-shells we use some heavy-duty elastomer of highest elasticity, dimensional stability, and abrasion resistance. This material is superior to all types of plastic, rubber, or caout-chouc-parts we have known so far.

We use exclusively original materials and colors by certified German manufacturers, and we are therefore in a position to guarantee for the physiological safety of our products.

In order to adapt our Circus Diabolos to various playing techniques we offer four different tuning-sets with CNC-turned POM-hubs.

Kolibri Diabolo

Small Diabolo suitable for little children or as a "Giant-Yo-Yo".

The half-shells are made of some special, extremely spring-elastic material which does not allow permanent deformations. The coil consists of two black plastic-hubs. Between these hubs a profiled, fully-galvanized turned-steel part forms the roller for the string. **Without handsticks!**

ø82mm, width 93mm, weight 145g.
Colors: red, yellow, green, blue, orange.

Jazz Diabolo

Our best-selling diablo – suitable for beginners and professionals. The elastic half-shells are very well balanced and safely centered on anodized aluminum hubs. Thanks to its low weight an excellent diablo for speedy performances. **Without handsticks!**

ø105mm, width 120mm, weight 255g.
Colors: red, yellow, green, purple, blue, turquoise, orange, black, white, glow.

Circus Diabolo

The Circus Diabolo is our largest one – suitable for beginners and professionals.

Due to its large diameter and the higher weight its rotational mass is much bigger and it must not be driven that often. Ideal for stage performances. **Without handsticks!**

ø130mm, width 140mm, weight 300g.
Colors: red, yellow, green, purple, blue, turquoise, orange, black, white, glow.

DIABOLOS

Circus Ultraight

Circus Allround

Circus Giant

Circus Twist

Circus Diabolo with Tuning Set

The Circus Diabolo with built-in Tuning Set!

For all Diabolo players, who want to buy a Circus Diabolo and a Tuning Set we are now offering a complete set containing both! **Without handsticks!**

Micro Diabolo

With an ellipsoidal contour of the half-shells and extra-large hubs we opened up a perfectly new way in diabolo design. This is emphasized by the newly-designed diabolo-strap with hook and loop tape and absolutely trendy handsticks of robust solid aluminum.

Excellent processing of best materials makes this small diabolo a high-performer. Soft, robust half-shells, CNC-turned aluminum hubs and a galvanized, thin axle allow extreme high-speed running with perfect smoothness.

Complete set including handsticks made of solid aluminum, HENRYS special string and the strap to fix it to one's pants.

ø80mm, width 63mm, weight 135g.
Colors: red, yellow, green, blue, orange.

Beach Diabolo

The Beach Diabolo is characterized by its extraordinary design and its unusual low weight compared to the size. The ribbed half-shells made of PE are to a large extent resistant to deformations and provide for quiet running characteristics. An inexpensive alternative for beginners.

ø120mm, width 125mm, weight 250g.
Colors: red, yellow, green, purple, blue, orange.

Vision Diabolo

The Diabolo for professionals and beginners!

Thanks to its size and its weight of 230g only, this Diabolo is also great for kids. The transparent (except black and white) half-shells are made from the same material as skater wheels. They are extremely strong. The coil consists of two black POM-hubs. A fully galvanized, profiled steel part between the hubs forms the string roller.

The Vision Diabolo is compatible with all Circus tuning sets. It is available individually or as complete set together with our popular aluminum handsticks.

ø130 mm, width 120mm, weight 230g.
Colors: ice, red, yellow, green, blue, orange, black, white.

DIABOLOS

Handsticks Kids

Simple, very short, wooden sticks for children. Rounded on both ends. The short length is ideal for children as it prevents fatigue. String length 1.2m.

ø10mm, length 260mm, weight 30g.

Handsticks Beach

Simple wooden sticks for lower demands. With string length 1.6m.

ø12mm, length 370mm, weight 70g.

Handsticks Handy

Wooden handsticks with thick handle. Ideal for adults. String length 1.6m.

Length 420mm, weight 75g.

Handsticks Fibre

Diabolo handsticks made of fibre glass tube, therefore very elastic. Springy when strongly hit; thus relieving the wrists. Polished precision parts on the string outlet prevent wearing of the string. The stick is completely encapsulated by a plastic hose. Therefore all unpleasant characteristics of fibre glass are prevented (edges easily breaking, risk of injuries by fine glass filaments). With soft cellular-rubber handle. Comfortably held. Grinding well possible. String 2.4m.

Either in black or white.

Length 350mm, weight 50g.
Length 410mm, weight 55g.

Handsticks Carbon

Diabolo handsticks for pros who prefer rigid sticks. Core of carbon-fibre tube, therefore considerably harder than fibre-glass. Construction and appearance like Fibre 350 and 410.

Either in black or white.

Length 350mm, weight 50g.
Length 410mm, weight 55g.

Handsticks Micro

Beautiful and robust diabolo handsticks for children. To play with small and light diabolos. Neatly processed, hard solid aluminum, polished, with black handle.

Length 25cm, weight 50g.

Handsticks Alu

Our least expensive diabolo handsticks for ambitious leisure time players. Very hard wearing handstick, which is, however, not too light. Made of high-duty polished solid aluminum. Handle made of light rubber. Comfortably held. String length 1.6m. Length 32cm, weight 80g.

Diabolo String

Our proven diabolo string on a roll, either in white (with grey core thread) or colored (UV-active). Thanks to its braided core this very hard-wearing string stays round even under hard strain.

Colors: white, red, yellow, green.

As 10m-roll, 25m-rolle und 70m-roll.

DIABOLOS

Diabolo String Set

Our diabolo string in a set of 3 pieces. Length approx. 1.6m, for Handy, Beach and Alu 325.

Diabolo Strap

To strap the diabolo to one's pants. Hard-wearing strap with clip and hook and loop tape.

Tuning Set Allround

Tuning set for Circus Diabolos. With wider hubs. Therefore better for finger tricks and grindings, yet continuously running. Content: galvanized steel-axle, aluminum cap nuts, aluminum-discs, POM-hubs, glossy galvanized roller. With this set mounted the Circus Diabolo is getting approx. 5mm wider and approx. 28g lighter.

Tuning Set Ultralight

Tuning set for Circus Diabolos. All parts are identical in size but made from lighter materials.

Content: galvanized steel-axle, aluminum cap nuts, aluminum-discs, POM-hubs, glossy galvanized roller. With this set mounted the Circus Diabolo is getting approx. 33g lighter.

Tuning Set Giant

Tuning set for Circus Diabolos. With extremely wide hubs it is easier to catch and more suitable for finger tricks and grindings.

Content: galvanized steel-axle, aluminum cap nuts, aluminum-discs, POM-hubs, glossy galvanized roller. With this set mounted the Circus Diabolo is getting approx. 14mm wider and approx. 12g lighter.

Tuning Set Twist

Tuning set for Circus Diabolos. With wider roller. Therefore excellent for finger tricks and grindings.

Content: galvanized steel-axle, aluminum cap nuts, aluminum-discs, POM-hubs, glossy galvanized roller. With this set mounted the Circus Diabolo is getting approx. 5mm wider and approx. 28g lighter.

FIRE

Our robust and light torch was designed with special affection for details. The central ash-wood stick is encased by aluminum tube reaching far inside the handle and is therefore unbreakable. An aluminum sleeve at the end of the wick protects the wooden stick from charring. The decorated wooden cone ends with one rubber and one aluminum disc, preventing damages on the cone when being dropped. The cone is safely held by a screw, which is mounted through the aluminum tube. The non-asbestos wick is interwoven with brass wire and therefore very hard wearing. Despite its fanciful design the Nite Flite weighs only 250g and is very well balanced.

Nite Flite

Our hard wearing, but light juggling-torch. The central ash-wood stick is encased by aluminum tube reaching far inside the handle, being closed by an aluminum sleeve at the end of the wick. The decorated wooden cone ends with one rubber and one aluminum disc, which prevent cone and wick from touching the ground. The wick (approx. 40cm long and 5cm wide) is interwoven with brass wire and therefore very hard wearing.

Length 51cm. Weight 250g.

Colors: red, yellow, green, purple, blue, silver, gold.

All torches are also available with white handles (easier to see and to catch in the dark).
On request!

FIRE

Swinging Torch

This simple and hard wearing swinging torch consists of an ash-wood stick encased by aluminum tube. The wooden stick is protected from charring by an aluminum sleeve at the end of the wick. With a round black knob of light rubber at the end of the handle. The wick is 50cm long and 65mm wide.

Length 52cm. Weight 170g.

Swinging Torch Alustar II

This very elegant swinging torch owes its delicate appearance to the thin aluminum stick, which connects the painted wooden knob with the end of the wick. Use of finest materials only make it a very special prop. The wick is 50cm long and 65mm wide.

Length 52cm. Weight approx. 165g.

Protector for Alustar

Accessory for the swinging torch Alustar. Protecting the wick when lying on the ground and also a dripping protection for the hands, depending on its position on the stick.

ø55mm, weight approx. 40g.

Fire Devilstick

The Fire Devilstick is made of aluminum tube, closed by aluminum sleeves on both sides. With brass-wire reinforced and therefore very hard wearing wick at the ends (approx. 40cm long and 5cm wide). Special lengths on request.

Length 65cm, weight 180g.
Length 75cm, weight 190g.

Devilstick Handstick

The handstick of a devilstick should be handy. This beech-wood stick is therefore covered by silicone hose.

Length 48cm, ø12mm.

Colors: transparent, white.

Spitfire Stick

Solidly finished, slender spitfire stick. With black painted wooden handle, solid aluminum stick, and wide wick.

Length approx. 44cm.

FIRE

Fire Poi

Fire Poi with chain and loop.

With length 60cm and big hand loop it is ideal for fire shows. With 50cm long wick. The Fire Poi can be upgraded to a Double with the Fire Poi Middle Piece.

Length 60cm, weight approx. 200g.

Fire Poi Middle Piece and End Piece

Middle Piece and End Piece as spare part or supplementary part for the Fire Poi.

Fire Poi Middle Piece
Wick 50cm with safety link.

Fire Poi End Piece
Wick 50cm without safety link.

Fire Poi Loop

Soft Fire Poi loop made of hose strap with sewn-in simplex carbine.

Fire Poi Safety Link

Safety link with threaded joint for safe connection of the chain with end or middle piece. Detachable.

FIRE

Fire Poi Chain 2mm

Thin chain made of galvanized steel. Usually used without hand loop. Can be twisted around the hand several times in order to keep its length variable while swinging.

Fire Poi Chain 3mm

Robust chain made of galvanized steel. Not too light and excellent for smooth swinging. Standard chain for our Fire Pois.

Fireproof Diabolo String

Fireproof diabolo string made of Kevlar.

2m long, piece.
100m-roll.

Torch Wick 50mm

Hard wearing replacement wick, width 50mm, brass-reinforced, for torches and devilsticks.

approx. 37cm long, with screws.
Running meter, without screws.

Deco Set for Torches

Decoration set consisting of decoration film and necessary tapes.

Colors: red, yellow, green, purple, blue, silver, gold.

Sparkler Club

Our Sparkler Club for special events. Where you have the body normally, you find an extra long sparkler on this club. It is very well visible and burning for about 2 minutes. Fantastic effect for light shows, hardly ever seen anywhere. The Sparkler Club consists of 40 individual parts. Use of best materials only, such as carbon sticks, duralumin, and ash-wood. Suitable for swinging and juggling.

Length 52cm. Weight 225g.

Set of 3 Sparkler Clubs

Consisting of 3 sparkler clubs, 1 Allen key, 1 side cutting pliers, 1 pack sparklers, 1 set of goggles, and detailed instruction manual.

Sparklers

40cm long, for sparkler clubs, burning time approx. 2 minutes.

JUGGLING PROPS

Spinning Plate

Hard wearing spinning plate made of plastic, with dished bottom, for quick experience of success. Individually or set with 60cm long wooden stick.

Colors: blue, green, yellow, red, purple, white, orange, neon green, neon yellow, neon pink, glow.

Spinning Plate Flexi

Plastic plate with vaulted bottom made of soft polyethylene. With its higher weight and its shape this plate is particularly suitable for outdoor games or courses. Individually or set with 60cm long wooden stick. ø23cm, weight 120g.

Colors: red, pink, yellow, green, purple, blue, orange.

Spare Stick for Plate

Wooden spare stick for juggling plate. ø8mm, 60cm long.

Juggling Scarves

Juggling scarf made of 100% nylon material in proven quality. As they are very slowly hovering to the ground, scarves are most advantageous for practicing sequences of juggling movements without getting under pressure of time. Made of chiffon, size: 70cm x 70cm.

Colors: white, red, pink, yellow, green, purple, blue, turquoise, orange, brown.

Cigarboxes

Robust cigar box made of poplar plywood, dovetailed and glued. Faces with black felt for better grip, edges with black tape.

Dimensions: 18cm x 12cm x 6cm, weight approx. 220g.

Cigarbox Neon

Neon color film on four sides.

Colors: orange, yellow, green, blue, pink.

Cigarbox Glitter

With glitter-decoration film on 4 sides.

Colors: silver, blue, red, yellow, green.

YO-YOS

HENRYS AXYS YO-YOS

All our Axys yo-yos are manufactured in our own factory in Karlsruhe. We therefore guarantee for constant high quality and the use of purest non-poisonous materials. All HENRYS yo-yos are equipped with our patented gap-width adjustment QUICK-TRICK. This innovative technique makes changing the gap width quick as lightning and helps adjusting the yo-yo to individual playing situations. Simply twist both shells slightly against each other and the gap for the string will get wider or smaller. Adjustable from up'n down to loop mode or ultra-long sleepers for long-lasting string tricks.

The three different axles Speed Explosion, Slider and Shockhead are suitable for all our **Axys Yo-Yos (Lizard, Cobra, Viper, Tiger Snake, Coral Snake)** and can be exchanged optionally.

Lizard (Axys)

The ideal yo-yo for beginners! A successful symbiosis of butterfly and loop yo-yo. Good for loops and also for string-tricks. Its shape is adapted to the hand. The Lizard is therefore easily and comfortably caught despite its hard (but unbreakable) plastic hubs. Thick rubber rings protect the yo-yo and its surroundings from hard impacts.

ø62mm, width 34mm, weight 48g.

Translucent colors: red, yellow, green, blue, orange.

Cobra (Axys)

The revised Cobra does now have the same Starburst as Lizard and Tiger Snake. It makes it more handy but it doesn't achieve the same grip as the Viper. It is therefore a good choice for beginners. With light, translucent plastic hubs, but in exchange with somewhat heavier half-shells than the Viper. With polymer slide bearing.

ø66mm, width 35mm, weight approx. 46g.

Colors: ice-red, ice-blue, ice-blue white, black-yellow.

YO-YOS

Viper (Axs)

The Butterfly yo-yo par excellence. Its soft and springy half-shells are comfortably caught. Unintentional ground contacts do them no harm. Specifically shaped, non-wearing precision hubs made of anodized silver aluminum, and a smooth-running precision ball bearing guarantee for maximum performance.

ø66mm, width 35mm, weight approx. 51g.

Colors: ice, red, yellow, green, purple, blue, turquoise, orange, black, glow.

Tiger Snake (Axs)

Inexpensive alternative to Coral Snake. Translucent plastic hubs made of unbreakable ABS-material make this yo-yo a great deal lighter than the Coral Snake. The maintenance-free polymer slide bearing with silicon addition works many years and is almost frictionless. For beginners who prefer a fast loop yo-yo.

ø60mm, width 27mm, weight approx 48g.

Colors: red-white, green-yellow, blue, black-orange, black-translucent.

Coral Snake (Axs)

A fantastic, slender loop yo-yo with turned, anodized precision hubs made of high-strength aluminum and spring-mounted power rings of heavy-duty plastic. Its well-defined surface-finish inside the string gap makes it biting enough to play quick loops. Its ingenious inner geometry around the ball bearing allows even double-string tricks. The string gap is partially widened, thus reducing the winding diameter of the string and increasing its maximum speed.

ø60mm, width 27mm, weight approx. 60g.

Power ring colors: red, yellow, green, purple, blue, orange, black.

Speed Explosion

YO-YOS

The new generation – Python, Viper Neo, Viper Neo XL, Viper Flux – Henrys' Bind Yo-Yos – a class of its own

Snake charming takes the next level! With a fourpack of thrills.

We have taken the revolutionary concept of the turn of the century cult yo-yo, the Viper, to new heights and tuned it to the requirements of today's yo-yo professional.

The result is a package of four exceptional yo-yos with outstanding playing characteristics that leave nothing to be desired.

Python

The Python is the ultimate yo-yo for today's professional. The Python's playing characteristics bring tears of joy to every professional's eyes. The Python lies snugly and with optimum weight distribution in the player's hand. It allows a dramatically dynamic style of playing and guarantees excellent performance. For string tricks, freehand, Triple A and off-string. The Python stands for yo-yo fun without limit.

ø61mm, width 35mm, weight 67g.

Colors: blue, red, white, green, black, yellow, orange.

Viper Neo

The Viper Neo is a very fast yo-yo. It is slightly larger than other yo-yos and comes in a wide variety of vibrant colors. This optimises its visibility for spectators. The Viper Neo is an excellent yo-yo for beginners. But also for advanced players, who wish to polish up their performance for admission into the professional leagues. For string tricks, freehand, Triple A and off-string.

ø66mm, width 35mm, weight 65g.

Colors: blue, red, white, green, black, yellow, orange.

YO-YOS

Viper Flux

The Viper Flux offers the properties of the Viper Neo combined with integrated hubstacks. These stacks open up a new dimension for really cool tricks. No limits! For string tricks, freehand and off-string.

ø66mm, width 35mm, weight 65g.

Colors: blue, red, white, green, black, yellow, orange.

Viper Neo XL

Due to its size the Viper Neo XL is very eye-catching. Hubs and axis are identical with Viper Neo. Its half-shells sized 80mm make it ideal for off-string and stage performances.

ø80mm, width 64mm, weight 110g.

Colors: ice, red, yellow, blue, green, orange.

Gecko-Pad

Spare parts kit consisting of two Gecko-Pads. For Python, Viper Neo, Viper Flux, Viper Neo XL.

MaxGap

Spare parts kit consisting of four washers and one wrench. For maximal string gap enlargement on Python, Viper Neo, Viper Neo XL.

MaxGap +B

Spare parts kit consisting of four washers, one wrench and one spare ball bearing. For maximal string gap enlargement on Python, Viper Neo, Viper Neo XL.

MaxGap +TB

Spare parts kit consisting of four washers, one wrench, and one spare ball bearing in trapezium shape. For even more fun and maximal string gap enlargement on Python, Viper Neo, Viper Neo XL.

Flux Axle

Spare parts kit with complete Flux-axle including precision smooth-running ball bearing, inner bolt, two standard caps and one thread protection cover.

Flux Tuning Set

Spare parts kit, consisting of inner bolts, thread protection cover, standard cap, one cap with string groove and one cap with top. For converting the Viper Flux into the ultimate yo-yo.
